SAP:	SAP BASIS, SAP Security, SAP Netweaver, SAP HANA
Programming Languages:	Java, Dart, HTML, CSS, JavaScript
Frameworks:	Flutter
Database:	MySQL, PostgreSQL
Tools/Platform:	VS Code, Android Studio, Firebase, Apache, XAMPP

PROJECTS

EasyPark - Smart Parking Management System

Key Skills: Swagger API, JSON Web Token (JWT), and more

Designed and developed a full-stack Smart Parking Management System to streamline parking operations for administrators and provide a seamless reservation experience for customers, with a web-based Admin Portal and a planned React Native mobile app.

EventHub - Integrated Centralized Campus Event Management App

Key Skills: Flutter, Firebase, Cloudinary

Developed a centralized campus event management app using Flutter, Firebase, and Cloudinary to streamline event creation, registration, QR/OTP attendance, live polls, feedback, and automated e-certificates. Tested across 5 campus events with 655 participants, achieving over 99% attendance verification accuracy.
